2018 POOL CLOSING WORK ORDER

Thank you for choosing Professional Industries, Inc., to service your swimming pool this year. We really appreciate your business. Please complete the enclosed work order on the front and back of this letter and return it at your earliest convenience. **Scheduling is done on a first come first serve basis.** In addition, it is very important to let us know where your winter cover is located. If you will not be available on the day we close your swimming pool (which is never a problem) please leave the following by the pool; all the plugs, water bags, and winter cover. Please make sure that the water and electricity are still operating around the pool area. It is the pool owner's responsibility to have the water chemistry properly adjusted. It may take up to 48 hours for chemistry to be properly adjusted. We will leave diving board attached unless otherwise noted on work order. Vacuuming pool prior to winterization is not included and time to complete will be invoiced accordingly.

Please check which services you would like.

Closing Package A \$415.00

Full Service Closing

Closing your pool consists of the following:

1. Lowering the water level below the return lines.
(If you have a fiberglass pool it is important not to remove any water.)
2. Drain and plug all pressure and suction lines.
3. Open all necessary valves.
4. Drain the filter, pump, and heater.
5. Blow out pipes with air.
6. Add nontoxic antifreeze to lines. (2 gallons included in package. Any additional antifreeze needed will be invoiced separately.)
7. Shock pool with chlorine. *(5 gallons included.)*
8. Add 1 quart sequestering agent & 1 quart algaecide.
9. Install cover & water bags if applicable.

Please note the following: 1¼ hours of labor/tech time included in closing package A. Additional time will be invoiced in ½ hour increments. Any additional chemicals or antifreeze that is not included in package will be invoiced separately.

Closing Package B \$335.00

Please note the following: 1 hour of labor/tech time included in closing package C. Additional time will be invoiced in ½ hour increments. Any additional antifreeze not included in package will be invoiced separately.

DO YOU WANT YOUR POOL TO LOOK LIKE THIS DURING THE WINTER?

SmartMesh safety covers consist of a long-lasting vinyl coated polyester fabric sewn with polypropylene webbing. (Yes, these are the covers that were tested strong enough to hold an elephant!) No cover pump is ever needed! This style of cover allows you to open your pool to clean clear water.

And it looks great all winter. **Check out the attached sale flyer!**

Filter Cleaning Service \$85.00

Professional Industries, Inc., is proud to offer a filter cleaning service that will help make your filter more efficient and keep your pool cleaner. In addition it will add to the life of your filter.

CARTRIDGE & D.E. FILTERS ONLY

We will remove the interior of your filter, soak them in a cleaning solution, and then wash them for maximum results. The process ensures that all oils accumulated through the pool season are removed as well as all chemical residues. This will ensure that your filter will work at its peak performance. We will reinstall the cartridges when we start up your equipment in the spring.

yes no

Salt Chlorinator Cleaning Service \$75.00

Professional Industries, Inc., is proud to offer a salt cell cleaning service that will help make your cell operate more efficiently. In addition it will add to the life of your salt cell. **All salt chlorinator manufacturers recommend that you have your cell cleaned and decalcified at least once a year.** Professional Industries, Inc. offers a cleaning service for the cell at the time of winterization. We will remove the cell clean it and decalcify it and reinstall the cell in the spring when it is time to open your pool.

Automatic Pool Cleaner Revitalization Package

Professional Industries, Inc., is proud to offer a service that will make your pool cleaner function better next spring. We will bring your pool cleaner back to our warehouse and refurbish it so that it will perform as good as new. We will test the cleaner, clean the cleaner, and make any needed repairs to your cleaner. You will only be charged for any parts used to repair your cleaner. You will not be charged a technician fee for this service. We will bring your cleaner back when we open your pool in the spring.

yes no

Vacuum Pool Before Closing \$80.00

This service consists of the following:

- 1. Check and balance water chemistry.
- 2. Vacuum leaves and dirt from pool water.
- 3. Service to be completed before pool closing.

Please note the following: Price is per hour. Any chemicals needed will be invoiced separately.

Winter Maintenance Package A \$100.00 per month

Once a month a crew will stop by your pool to clean off the water and debris from your winter cover. We will add chlorine and algaecide to the water to help maintain the water chemistry.

Please note the following: 1 hour of labor/tech time included in maintenance package A. Additional time will be invoiced in 1/2 hour increments. Any additional chemicals needed will be invoiced separately.

Winter Maintenance Package B \$70.00 per month

Once a month a crew will stop by your pool to add chlorine and algaecide to the water to help maintain the water chemistry.

Please note the following: Any additional chemicals needed will be invoiced separately.

Winter Chlorine Package Package C \$55.00 per month

At the time of closing we will supply a chlorine floating feeder filled with chlorine tablets. Once a month we will stop by your swimming pool and refill the feeder. This will help keep the water chlorinated and cleaner at time of opening.

Winter Hot Tub Service \$64.00 per Visit
